What prompted you to buy GemmaCert?

It appears as an innovative and quick tool for cannabis industry. It is very important to have tools that help industry to have quick answers. GC is unique in the cannabinoids field as it doesn't need any special technical requirements to operate it or any type of sample preparation before analysis (beyond drying and grind).

How do you use GemmaCert at your business?

To follow the cannabinoids evolution of the crops before harvest and during R&D projects.

What feature do you love most from GemmaCert?

What I love the most is its portability and easy operability. The constant software updating, and continuous supplier contact is also a plus.

Would you recommend others to purchase a GemmaCert device?

Yes, sure. Is really an important tool at any cannabis research lab.
